

# International Petition from 200 Doctors to the Economic Affairs Committee, Legislative Yuan of Taiwan

Dear Members of the Economic Affairs Committee,

As physicians, we are writing to oppose the Council of Agriculture's (COA) plan to use animals in unnecessary and cruel rabies experiments. Control of rabies does not require that the government infect animals with rabies. Suitable in vitro methods are readily available, and we call on Taiwanese authorities to use these modern methods in their programs to study rabies.

Sincerely,
